# MemComb Sprint 3

Bassam Thomas
Danny Naum
Chris Stidham
Scott O'Neil
Nathan Hyde
David Michon
Jacob Couveau

Landing and About page
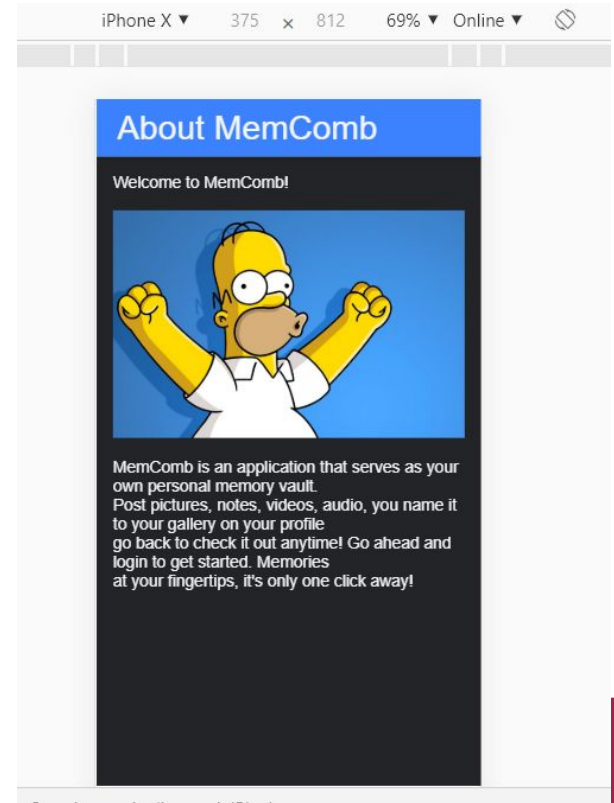

Events Page Grid Implementation

Risks and Challenges

- Integrating the database
- Making the app scalable for the desktop and app versions
- Implementing the events that will store the audio/video/text files
- Connecting different users based on similar stored items
- Scraping Google search results

Demo

Looking Forward

Next Sprints goals:

- As a user, I shouldn't be able to go to other tabs before I login
- As a user, I should have a clean profile page to see my personal info
- The system shall have a database hosted in Google Firebase
- The system shall differentiate users in Firebase via Okta integration
